

**Project Design Phase-I**  
**Proposed Solution Template**

Date	24 September 2022
Team ID	PNT2022TMID32423
Project Name	CONTAINMENT ZONE ALERT
Maximum Marks	2 Marks

**Proposed Solution Template:**

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The objective of this project is to provide virtual assistance to user(customer) about the containment zone. It also provides updated data base about the affected area.
2.	Idea / Solution description	We intend to collaborate our application with google map to locate the containment zone. Constant updation of result collected from the testing center about the affected people can be merged with the application.
3.	Novelty / Uniqueness	When the location is ON, it will alert the user before reaching the place, whether the place is affected or not. If affected it will enroute alternate way.
4.	Social Impact / Customer Satisfaction	This project will satisfy the customer need. For example: Suppose if we travel to a place where a specific area is affected by covid this application will alert the user(customer) which in turn reduces the cause of infection by the affected people.
5.	Business Model (Revenue Model)	1.Internet usage 2.No.of users downloading the application 3.In association with pharmacy(telemedicine)
6.	Scalability of the Solution	Currently, we use this application for covid emergency situation. Later, it can be used for other emerging pandemic condition.
